

11/23/2015

NYM partnered with CIS for assistance implementing NetIQ IDM. While NYM has been a long time eDirectory user, our experience with IDM was lacking and previous attempts did not succeed. CIS was able to not only perform the implementation but did so within three months. They were able to accommodate all of our requirements and provide some training and knowledge transfer to onsite staff for future support.

This experience went so well that NYM has since partnered with CIS with other eDirectory projects and we expect to continue the partnership well into the future.

Sincerely,

Peter Cox
